

# Are you "for" or "against" national health care reform?

## Regardless, change is coming.

**Whatever your opinions about national health care, some kind of change IS coming. We need to understand what's going on, how it may impact Virginia Chiropractors and their patients, and have a voice in the discussion... while it still counts.**

**That's why,** to augment what the ACA and other chiropractic organizations are doing and the development of patient advocacy groups through [ChiroVoice.org](http://ChiroVoice.org) and [AdjustTheVote.org](http://AdjustTheVote.org), the Virginia Chiropractic Association (VCA) has hired LeClairRyan, a national law firm headquartered in Virginia that offers extensive expertise in non-profit political activity. The firm is conducting an in-depth assessment of the status of the debate with respect to Virginia's chiropractors and helping us to develop a strategy for moving forward. It will assist us in conducting informational and informal meetings with select Virginia congressional representatives, ACA and other lobbying teams, and other select individuals to assist in assessing the status of the current situation and how to combine our resources to make sure chiropractic's voice is truly heard during this critical time.

To raise funds for this project, we have established the **Virginia National Health Care Reform Action** fund. To get things started, every VCA Board Member has contributed \$250 and the VSC Board has also pledged its financial support. We ask that you give what you can, as well.

Regardless of whether your perspective is national or state, we are ALL stakeholders in this healthcare debate. **This project is underway, so please respond today.**

**Yes, I want to ensure that the Virginia chiropractic profession understands and has a real voice in the health care debate.**
